Paul Buller
President
Buller Engineered Products Ltd.

Dear Paul,

I wanted to thank you for the demo of your Razerlift product for our Calgary team. The automated roof mounted rack system that you have designed is quite impressive. Not only would it allow us the potential to store multiple ladders in a convenient and safe manner, but the preliminary pricing is also very competitive with other non-automated, less capable ladder racks on the market. The obvious safety benefits are appealing with the loading/unloading of ladders at a safe height and motorized lifting minimizing the risk of injury for our employees. We look forward to discussing the possibility of beta testing a unit on one of our Calgary work vans when they become available.

Sincerely,

Josh Cunningham
